Holland's Muzzle Brakes

Option 1 - Introducing Holland's Radial Baffle Quick Discharge™ Muzzle Brakes!!

Holland's Radial Baffle Quick Discharge™ Muzzle Brakes offer improved recoil reduction due to the unique radial baffle design. Radial baffles trap the gas and divert it around the shooter in a rearward direction, increasing the recoil reduction over a 90 degree exhaust pattern. Radial baffles increase the surface area for the gas to work against, providing exceptional performance. Our **blank area** on the bottom of the brake virtually eliminates the dust cloud signature and prevents dirt and debris from being kicked around the shooter. Imagine being miles from the truck and getting something in your eye from a 360 degree ported brake! **Holland brakes are better by design; as a long range hunter and shooter I know what it takes to get the job done right!**

There is some great video footage on www.longrangehunting.com of our radial baffle brake being fired on a XP-100 chambered in 7mm DAKOTA. It's great footage showing the performance of our radial design.

All brakes are machined from 17-4 stainless steel and heat-treated for maximum durability. Thread sizes are 5/8x28 and 3/4x28. Smaller sizes will be available in the near future.

QUICK DISCHARGE™

OPTION 2 - Holland Triple Baffle
Quick Discharge™ muzzle brakes set the standard by which others are judged! Our brakes allow you to enjoy the graphics of each shot and the blank area on the bottom eliminates the problem of dust and dirt getting back to you while you're shooting. We offer several styles of specialized muzzle brakes to the shooting industry. Holland models include the Holland **Quick Discharge™** and are constructed from stainless steel and blued chrome-moly.

- Eliminates muzzle rise
- Adds 1¼" to barrel length
- Unique triple baffle design
 - Reduced muzzle blast
- Measured reduction of 45%
 - Easier cleaning

We use only the best heat-treated materials and **CNC (computer numerically controlled) machinery** in the manufacture of our unique brakes! Adds 1.250" to the rifle's length.

The large ports allow for easier cleaning in the field, a must for varmint shooters. Our prices for these specialized brakes are so low, you couldn't begin to make them for yourself for the same money!!

All of our brakes feature a blank area on the bottom of the brake to minimize muzzle rise and to keep dust and debris from blowing up around the shooter!
